

DEAMCO has furnished a substantial number of various types and sizes of equipment and systems for commercial, industrial and military requirements.

## deamco's commitment

### THE DEAMCO COMMITMENT

Good people, good business practices and creative engineering are time-tested components of DEAMCO Corporation's success. These elements are reflected in every facet of DEAMCO'S business and represent DEAMCO'S commitment to you.

### STATE-OF-THE-ART TECHNOLOGY

Working with both large and small firms, DEAMCO maintains a leading position in the technology of specialized automated systems. DEAMCO's engineers address your requirements with the most cost-effective solutions. DEAMCO merges its engineering capabilities, depth of experience, and state-of-the-art technology to meet your needs.

### QUALITY CONTROL

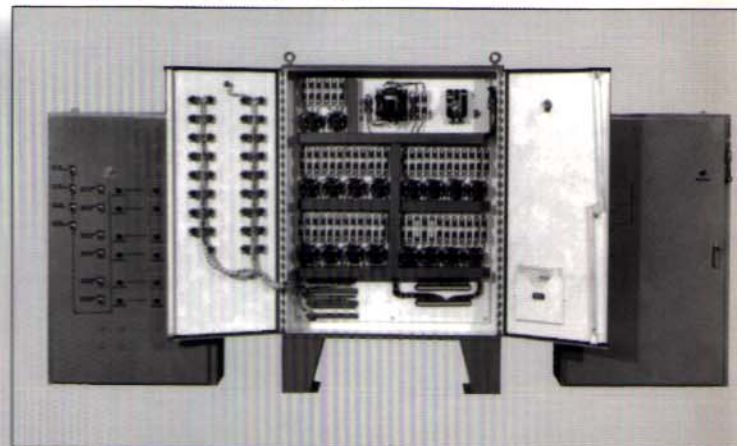

DEAMCO's stringent production control procedures ensure that the manufacturing schedule, purchasing of materials and components, and fabrication cycle meet your delivery requirements. As fabrication proceeds, DEAMCO performs quality assurance checks to meet your specifications.

### LIFE-LONG SERVICE

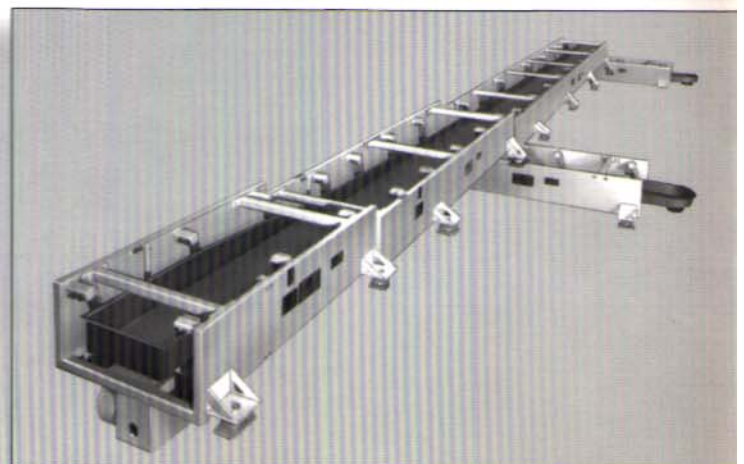

DEAMCO provides maintenance services throughout the life of your system. Using the latest data-retrieval system, we can dispatch service assistance from our offices in the U.S. or abroad. DEAMCO's technical field supervisor assists you in installing your system, starting it up; and training your personnel to operate it and perform on-site maintenance.

DEAMCO Product Dehydrating Process and Store-A-Veyor System
